

## SAFERIDER

### Passenger Controlled Hoist

#### Key Features

- Passenger Controlled**  
 Electro mechanical hard wired controls. 9Tonnes cable breaking strength - 150kg limited.
- Safe and Efficient**  
 Workers control themselves to the right position every time.
- Portable**  
 Use the optional jib frame for efficient access over the side. Less persons at risk than rope access.
- No Miscommunication**  
 Hard wired. No reliance on hand signals, flaggers, radios to fail at the critical moment.
- Simple and Robust**  
 Easy trouble shooting by rig crews. Designed for rig operations. Passenger control may make some sensors redundant.
- Precision Electric Drive**  
 Load limiting is integral to the hoist controls. Speed and acceleration are configurable. Nothing to break.
- Classification Society Approved**  
 Designed and tested to DNV OS-E101, ABS, CDS and API-2C.
- Third Party Certification optional extra**  
 Some DNV OS-E101 features are optional.

#### Optional Extras

- Lebus Drum Grooves
- Drum Pressure Roller
- Wire Rope Spooler
- Over the side jib frame.
- Fixed Limit Switches\*
- Slack Wire Detector\*
- Hard wired intercom or attention bell
- Flashing overhead warning light

\* May be redundant using passenger controls
